Vehicle Manager Fleet Network Edition Crack+ Incl Product Key [Updated] 2022

Would you like to have a detailed view of your Company's Vehicles including History and current usage? The Vehicle History Log is an essential Report in every Vehicle Fleet. Vehicle History includes information on all Vehicles, Equipment and Rests. Each Vehicle is identified uniquely, and you can view the complete history for any of these vehicles. This report lists the vehicles, with their identification, the sum of Total Hours, as well as the total mileage driven. In addition, you will be able to see detailed details about the maintenance performed for any vehicle, and what mileage was added/subtracted in the process. You will be able to see the Date and Time of each maintenance, as well as the Cost and Warranty Expires of each service. Other useful reports available with this application are: Vehicle Utilization Report Vehicle Utilization Report is a percentage based report that shows the usage of a Vehicle based on the date of it's Last usage. The report is calculated per Vehicle type (Car, Truck, Van). Vehicle Utilization Report also shows the Total Hours driven for each Vehicle. The hours are counted per Vehicle type and Days since the last usage. Vendor Utilization Report The VU report shows the number of vehicles per Vendor, as well as the total hours driven for each vendor. The VU report is based on the Vehicle type for a specific Vendor. Vehicle Fleet Optimization Report The VFO report is a Detailed Top Level Analysis of the average Cost of a vehicle per Hour. The report also shows the top 5 vehicles in terms of cost. Vehicle Manager Fleet Network Edition Cracked Accounts is an advanced software application whose purpose is to help you track your vehicle maintenance, contacts and vendors. What's New In?

Vehicle Manager Fleet Network Edition is an advanced software application whose purpose is to help you track your vehicle maintenance, contacts and vendors. It can be used with a remote Firebird server in order to store information about scheduled and completed maintenance, parts, expenses, usage and other details in a central database. Clean feature lineup The GUI looks intuitive and employs a multi-tabbed layout for providing quick access to several vehicles, service items, parts, personnel, vendors, set of configuration options, as well as reports. In case you have some questions regarding the functionality of the dedicated parameters, you can have a look at the help manual. Manage your vehicles, fuel log, service and parts Storing vehicle information in your database can be done by providing details about the model, year, odometer, color, driver/operator, type (e.g. car, tractor, trailer, truck, van), license registration, and insurance (company, account and due date), as well as entering mechanical data about the engine, transmission and size. In addition, you may assign a custom picture from your computer, add custom notes, set the current vehicle active or inactive, delete the selected vehicle, as well as perform searches. Vehicle Manager Fleet Network Edition is able to display the complete fuel log history of your vehicle, and total fuel cost and average fuel efficiency. You may also print reports covering specific date ranges. The program reveals a complete list with scheduled tasks for the selected vehicle. Plus, it makes use of colors in order to indicate whether the service is up-do-date (green), coming soon (yellow) or overdue (red). You can also check out a list of service items that has been completed for the selected vehicle, and view detailed information about the date, service item (e.g. replace spark plugs, rotate tires, replace air filter), odometer and total cost. The utility shows info about the parts and materials that have been used on a specific vehicle, and you can also store attachments for your vehicles. The attachments are saved in database and included when creating backups. Service, part and personnel management features Vehicle Manager Fleet Network Edition gives you the freedom to add service items to a custom list, choose between several templates, as well as organize service items to a group and run scheduled task for an entire group. You can track all parts that are used on any vehicle, personnel records (e.g. last and first name, license number, license expiration,
